1900
HOURS

Public Meeting was opened by
Public Relation Officer of EPA.
Almost 40 people were present
including a few children.

EPA - 2

NV DNR - 1

NV Health Dept - 1

TAT - 2

TV people - 2

Other people - 45 (approx)

1st sampling October 1984 (105 sopt
Bob (osc) mentioned that we have
taken precautionary measure for
off site migration of PCB. We
are going to take lot more
soil, water and drum samples.
within near future. PCB is not
soluble in water but it may
be migrated through dirt.
We will sample the Spring also.
We are mostly concern about the
well, if it is at all there
in ~~the~~ Minden.

400010

We are going to maintain the security of the site. Total money may be 500,000 dollars.

[REDACTED]

400011

- PCB accumulates in fatty tissue.
- (9) We have fenced, posted and we will remove the soil on the 11th face.
- (10) Some people of Japan ingested rice contaminated with PCB. They died. This was the 1st point, when scientist started to think about PCB.
- (11) All the ideas about PCB in (1-29 ppb normal people blood) came out from lab test on rats, rabbits, monkeys, etc. - Dr Guzzi of OSC
- (12) Some childrens who were in Shaffers Equipment, may have been exposed to PCB. If there is anyone may see OSC (as per OSC)
- (13) Superfund is a law. We are not a garbage man. Laws are law. EPA have the authority to take action who is responsible for creating hazardous waste. (OSC)
- (14) City water supply normally test the water for hazardous waste twice in a year (OSC) 400012

(REV)

02/20/85 1900 - PUBLIC HEARING, MINDEN SCHOOL
 EPA, TAT, CO, ETC - 10
 Other at 1900 hours - 20

Osc mentioned that there is a confusion about the start of the meeting. We will be waiting for a matter couple of minutes for starting the meeting.

1910 - Start.

Bob Chadwick introduced Osc.

Osc - Short back ground of our activities, soil, transformer etc to be removed. 850,000 \$ is the ceiling upto date. PCB Transformers were sent to G.E, PA, Empty transformers will be transferred to some land fill. Waterline will be completed by next week. This wk end the water line may be shut off. Next week soil will be ~~see~~ scrapped off.

\$250/c.y for removal of pcb soil.

This is the reason for a high expenditure.
